### WARNING:

Cooking with a gas propane tank results in delicious food, but is also dangerous & requires your utmost attention. All residents who rent the BBQ at Veda must watch the below video:

[Click here to watch BBQ YouTube tutorial](https://www.youtube.com/watch?v=4N720-7uGQU)

<https://www.youtube.com/watch?v=4N720-7uGQU>

### QUICK HOW-TO:

- ▲ BEFORE OPENING THE GAS SUPPLY, ensure the lid is open, control knobs are in "OFF" position, gas is turned off, and the regulator is attached to the tank correctly.
- ▲ CAUTION: In direct sun / operation, your BBQ's stainless steel and painted parts can become very hot.

#### ▲ CAUTION

Turn controls and gas source "OFF" when not in use.

#### ▲ TO LIGHT THE MAIN BURNERS:

1. Open the lid.
2. Make sure all burner control knobs are turned "OFF" (Push the control knob in and turn clockwise, to ensure that the control knob is in the "OFF" position).
3. Turn the LP tank valve ON slowly (turn counterclockwise). Wait for pressure to stabilize.
4. Push in and turn selected control knob counterclockwise to the "MAX" ( ) position.
5. Push the ignition button. You should hear rapid clicks. Repeat if necessary.
6. Check that the burner is lit.
7. After the burner is lit you can turn on the other burner control knobs. If the burner fails to light properly within 3-5 seconds, turn the burner control knob "OFF". Also turn off the LP cylinder valve. Wait five minutes before attempting to light the burner again. VERY IMPORTANT: This will allow time for the released gas to disperse.

#### ▲ WARNING

Never stand with your head directly over the barbecue when preparing to light the main burners, to prevent possible bodily injury.

**▲ WARNING**

Never operate main BBQ burners in conjunction with the Infrared Rotisserie burner, as this may result in overheating your BBQ, fire, explosion, personal injury or property damage.

**▲ HOW TO SHUT OFF THE BBQ:**

1. Turn the burner control knob(s) "OFF" by turning clockwise to the "MAX" position, then push-in and turn to the "OFF" position. The burner flame will go out.
2. Turn off the LP cylinder valve by turning the hand wheel in a clockwise direction until it stops.

**▲ ATTENTION**

The burner control knobs must be in the "OFF" position before turning on the liquid propane cylinder tank valve. If left in the "ON" position, when the LP cylinder valve is opened, the "Flow Limiting Device" feature will activate, limiting the flow of gas from the LP cylinder. If this should occur, turn "OFF" the LP cylinder valve and burner control knobs and repeat the lighting instructions.

- **CAUTION!**
- **AVOID BURNS!**
- **DO NOT TOUCH WHEN BBQ IS IN USE!**
- **EXTREMELY HOT SURFACE!**
- \* **SHADED AREAS BECOME EXTREMELY HOT WHEN IN USE.**

**RESIDENT RISKS:**

- ✓ The resident assumes all risk in relation to use of the BBQ and any damages from any cause whatsoever. The resident should use the BBQ with the utmost care and attention to safety.
  - ✓ The resident hereby agrees to indemnify the Landlord and all their related agents, and to hold and save the Landlord harmless from any injury, damage, expense, or claim arising from the resident's act's or omissions, and the Landlord shall not be liable to the resident for any injury or damage that may result from, or through the act or omission of other residents or of any other person.
- I, the resident, have read & watched the above video and I understand how to properly operate a BBQ.
- I, the resident, & my guests, will never leave a lit grill unattended.
- I, the resident, & my guests, will not smoke near the BBQ/propane tanks, as I/we understand it could cause a fire/explosion, resulting in death or serious injury, or property damage, which we will be responsible for.
